

# 4 Activities to Begin Your Class

## How Many Uses Can You Think of?

This is a great way to get your students started on thinking creatively. Show them an object and have them come up with as many uses for it.

## Riddles and Guessing Games

There's an abundance of materials that you can find online. Starting off with a riddle will help your students develop problem solving skills.

## Memory Games

Games like "I went to the shop and bought..." or the Telephone Game are great ways to get your students' attention and engaged in the class.

## Jigsaw Puzzles

Place a few sets of puzzles on your students' desks and have them work together in groups during the start of the class. This helps them refine their motor skills and keep them alert for the start of the class.
